

Front-end developer and UX/UI designer with **more than 8 years** building interfaces remotely for companies in Spain, Germany and Colombia. I design in Figma and ship to production in React and Angular over REST APIs, with a focus on accessibility and responsive design. Today I develop with **multi-agent AI under spec-driven development (SDD)**: my daily way of working, not an add-on tool. Founder of an education technology company.

EXPERIENCE

MAR 2026 – NOW

Front-end developer · AI agent orchestrator

[Interkont S.A.S.](#) · Colombia, remote

Multi-agent AI under SDD is the team's end-to-end method: from user stories with the client to front-end architecture. React and Angular interfaces, documented in Storybook, with Playwright green on every pull request.

AI-DRIVEN DEVELOPMENT

- **SDD** with multi-agent flows in Claude: the spec drives the work, and looping and prompting cycles iterate on it through to production code.
- **Custom agents and automations** with n8n, MCP and AWS Bedrock AgentCore.
- **Guardrails in CI**: automated guardians, Playwright end-to-end tests and WCAG 2.1 AA audits on every pull request.
